

Hello Sir,

I would like to ask few questions about my life and marriage..I performed kala sarpa dosha pooja last year and please be specific...

Questions:

1. Will I get married or not? If yes then when? I have been trying for 8 to 9 years.
2. Can you please predict how my life will be?

1. Not as things stand right now, with your Rahu mahadasha till 14/11/2023

you have a late marriage with but with the remedies so that it does not break

to arguments and fights. It is good that you have done the remedies or Pooja for Kaal Sarpa Dosha but you need to also do the remedies for your 12<sup>th</sup> house planets and Mars

some simple remedies like doing puja for the Moon, giving water to

also if you get the detailed chart done then I can explain all this and the gemmological remedies. This is a no frills option.

2. Can you please predict how my life will be?

2. This is a question and difficult to answer but except for your marriage your life would be good from the career point of view and you would have lots of money via your profession and you would be an asset to your family and from 2024 time would be much more predictable and even though you could get married but if you are not careful then it could break up but you would become a mother either via conceiving or adoption. You would be interested in spirituality and religion as your age progresses and you would reduce you habit of unnecessary arguments that tend to ruin your personal and professional life. You should also keep a red cloth with yourself for the same.
